## TAANA ROSE to release single 'Unexpected Love' on March 9th

**Taana Rose** is a multi instrumentalist singer/songwriter who plays guitar and synthesiser, while performing with a Launchpad using electronic vocal looping. Her latest single *Unexpected Love* is set to be released on the 9th of March. *Unexpected Love* is about heartbreak, giving up and the unexpected nature of love.

*Unexpected Love* explores how one sometimes gives up on life and love and then out of the blue, an unexpected love comes along and changes your life for the better. It's about surrendering to life's bigger plan and coming to the realisation that we are not in control; and that there is a higher power that one must learn to surrender to. A collaboration between **Taana Rose** and **Matt Sorensen**, *Unexpected Love* saw **Taana** writing the lyrics and vocal melody while **Matt** produced the track. The vocals were recorded at ArtofAudio in Byron Bay, Australia, while the instrumental track was produced at **Matt Sorensen's** personal studio.

**Taana** has completed a Bachelor of Music Technology at the Queensland Conservatorium Griffith University, Australia. In 2017 **Taana** performed two improvisational electronic music sets at the Queen Street Mall for The World Science Festival, in a trio with **Matt Sorensen** and **Blair Johnston**.

Developing a passion for music at a young age, **Taana** began playing guitar when she was 12. She grew up in a musical household where Vangelis, Karunesh, Stevie Wonder, Xavier Rudd, India Arie and Sarah McLachlan were played daily. In 2012 her first single *Carefree Days*, an acoustic original, was recorded in Byron Bay. In 2014 **Taana Rose** began studying Music Technology at the Queensland Conservatorium of Music, Brisbane. She began playing the synthesiser, using Launchpad and creating vocal loops at this time. The **Electronic Music Ensemble** had various performances utilising electronic instruments in conjunction with Ableton Live. They performed in the Conservatorium Theatre, collaborating with the Conservatorium Wind Orchestra and The Band of Frequencies in 2015 and 2016.
